Profile

I'm a front-end web developer with over 5 years of experience, dedicated to crafting intuitive digital solutions. My passion for design and functionality drives me to create user-friendly interfaces that enhance engagement. From concept to launch, I focus on details that elevate brands and deliver impactful user experiences.

Employment History

Front-End Web Developer, Brothers in Arms, Canada

January 2025 — Present

Internship - This collaborative internship project aims to develop a dynamic and interactive website for Brothers in Arms, featuring responsive design, seamless navigation, and multimedia integration to enhance user engagement. The site will provide real-time updates, donation functionalities, and social media integration, creating an immersive experience that connects users with the organization's mission and values.

Hardware Firmware System Integration Engineer, NCR/ATLEOS Corporation, Cebu City

December 2022 — August 2023

Full-time - As a Hardware Firmware System Integration Engineer at ATLEOS NCR, a leading company in the development of ATM machines worldwide, I was responsible for the development, updates, and bug fixes related to BIOS/OS and Windows drivers across various versions. My role required a deep understanding of hardware and software integration, ensuring that all systems functioned optimally across different ATM configurations. In close collaboration with Dundee's team, we identified, resolved, and tested issues, performing rigorous validation in our laboratories using real ATM machines. This hands-on approach ensured the accuracy and reliability of all updates and fixes, maintaining the high standards of system performance and security.

IT Teacher, Southern Leyte State University, Sogod Southern Leyte

May 2021 — May 2022

Part-time - I teach students the basic fundamental of computer system, how to use adobe photoshop and animation.

Front-End Web Developer and Customer Integration System Support, Paynamics Technologies Inc., Makati City

September 2015 — January 2020

Full-time - As a Web Developer and Customer Integration System Support (CISS) at Paynamics Technologies Inc., a leading payment provider company, I was responsible for developing and creating dynamic, responsive webpages and payment portals to enhance the customer experience. My role involved designing and maintaining plugins and APIs that enabled seamless integrations for clients and merchants across various platforms, including eCommerce solutions such as WordPress, Magento, and Shopify, as well as

Internships

Front-End Web Developer, Srishti Foundation, London Canada

January 2025 — Present

This collaborative internship project involves the development of a dynamic, interactive website dedicated to Brothers in Arms Memorial to honoring military veterans, aimed at providing an engaging and immersive online experience.

Front-End Web Developer, Fanshawe Industry Night 2025

Our website's primary goal is to inform and invite industry professionals to Fanshawe College's Industry Night 2025. This event showcases the final integrated projects (student capstone project) of Level 4 students from the Interactive Media Design Program (IDP3). This upcoming year, students will be tasked with designing and developing a website for the Brothers In Arms Memorial, an initiative by the Srishti Foundation dedicated to honoring military veterans. Industry Night offers professionals

Excellent interpersonal and communication skills for technical discussions and documentation

Self-motivated with a results-driven mindset to improve tools and processes

Ability to write clear and concise documentation for APIs, tools, and processes

Experience with API testing frameworks such as Postman

Familiarity with cloud platforms (Azure, Google Cloud)

Experience with microservices architecture and API gateways
